Gustavo KERDOLE GONTIJO

Quantum Scientist

I am a young, passionate physicist driven by curiosity and admiration for intriguing questions. I'm interested in working on the scientific research and development of quantum technologies, such as quantum computing and communication, and its applications to real-world problems.

Education

M2 Degree in Quantum, Mathematics, and Computer Science (QMI)

September 2026 [IP Paris](#) Palaiseau, France

Approved for the QMI M2, a program that focus on everything you need to work on the theoretical, mathematical, and computer science-related aspects of the quantum revolution.

Master of Science in Engineering (Diplôme d'ingénieur)

Since September 2025 [Télécom Paris](#) Palaiseau, France

On the second year, following the study tracks "Applied Algebra: Cryptography, Quantum Information, Coding" and "Markets, Organizations, Data, Strategies."

Bachelor in Physics

Since March 2022 [University of Campinas \(Unicamp\)](#) Campinas, Brazil

Work experience

Undergraduate Research funded by CNPq under the PICME program.

From August 2022 to September 2025

[Universidade de Campinas \(Unicamp\)](#) Campinas, Brazil

In my first year, I worked on applications of Fourier series to solve real-world partial differential equations. Then I studied models of neutron stars and black holes. Finally, I worked under supervision of Professor Dr. Marcelo Terra Cunha on the project "What can we learn from 2 qubits?", focusing on one and two qubits systems to understand key aspects of Quantum Theory.

Skills

Quantum Computing and Quantum Theory of Information

Undergraduate research and advanced courses on these topics.

Scientific programming

I worked on many problems using Python.

Literature Review

During my research experience, I had to review many important references.

Scientific Communication

I have presented posters and seminars about my studies.

Computer skills

Python and LaTeX

Long experience in both.

Additional education

● XII Advanced School of Experimental Physics

January 2023

[Brazilian Center for Research in Physics \(CBPF\)](#) Rio de Janeiro, RJ, Brazil

I worked with superconductor materials for 2 weeks. We had classes and experimental activities.

Poster: The spacetime geometry and the Einstein equations.

● Minicourse on Quantum Computing

April 2024 [ICTP-SAIFR](#) São Paulo, SP, Brazil

Introduction to quantum computing paradigm, algorithms and software.

● XVII ITA's Manuel Malheiro Physics Meeting

July 2024

[Aeronautics Technological Institute \(ITA\)](#) São José dos Campos, SP, Brazil

We had an introductory minicourse on quantum computing, learning about Qiskit and IBM Quantum, among other courses and presentations.

Poster: Insights into the Hawking process of quantum mechanical emission of radiation by black holes.

● 7th Journeys into Theoretical Physics

July 2024 [Perimeter-SAIFR-IFT](#) São Paulo, SP, Brazil

A school of two weeks with lessons about four advanced topics, including quantum computing.

● Quantum Computing with Qiskit

From July 2024 to September 2024 [Brazilian Physics Society](#) Online

Quantum algorithms and Qiskit to do classical emulation and experiment on IBM quantum computers.

● Advanced Quantum Computing: Algorithms, Machine Learning and Optimization

From September 2024 to December 2024

[Extension School of Unicamp](#) Campinas, SP, Brazil

An immersion in quantum algorithms applied to real challenges, with a focus on machine learning and quantum optimization.

● Second Quantum Computing School

October 2024 [ICTP-SAIFR](#) São Paulo, SP, Brazil

Hands-on courses covering basics and advanced concepts on second-generation quantum technologies including: quantum algorithm, quantum simulations, quantum machine learning and quantum communication protocols.

Other events

XXXI Scientific Initiation Congress · Unicamp (October, 2023)

Poster: Application of the Fourier series to solve the isoperimetric problem.

XVIII Postgraduate Scientific Meeting of the Institute of Mathematics, Statistics and Scientific Computing · Unicamp (May, 2024)

Seminar: Newton's gravitation as a particular case of general relativity.

XXXII Scientific Initiation Congress · Unicamp (October 2024)

Poster: An approach to the Hawking process of radiation emission by black holes.

Seminars of IMECC · Unicamp (November 2024)

Seminar: Linear Algebra and Quantum Computing
